“FPSO Conversion – An Overview”

Abstract:-

In the last decade there has been tremendous increase in conversion of vessels to FPSOs and the trend is on the rise. This paper gives a brief overview of FPSO with an emphasis on the conversion activities carried out in a shipyard. A general description of FPSO explaining functions of equipments and structures, crude oil and gas processing, mooring systems and offloading arrangements are explained. Further design aspects like layout principles and statutory regulations applicable to FPSOs are briefly outlined followed by description of major activities carried out in a conversion yard.

Date - 25th March 2008, 7.00 PM to 9.00 PM.
Venue - Capitol Hotel, Bur Dubai (Location map attached).
