

Technical Paper Presentation

By

Mr. Gunnar Haug

Market & Sales Director – Far East and Middle East
ULSTEIN Middle East (DMCEST)

On

“Designing Environmentally Sustainable Ships”

Abstract:

- Design know-how for proven ways of reducing carbon emissions
- Next generation vessels – how will the ship of the future look when the focus is low emissions
- EEDI and shipbuilding

Presenters Profile:

*Gunnar Haug is the Market & Sales Director - Far East & Middle East, working for the major Norwegian ship builder, equipment manufacturer and ship designer **ULSTEIN** Group. He was responsible for establishing the Middle East office in Dubai two and a half years back, and is now heading the Asia Marketing and Sales activities of **ULSTEIN**.*

Gunnar is a certified Master Mariner and has been in the Marine Business all his life, starting off in the Royal Norwegian Navy, later as deck officer, supercargo and stability section leader in companies like Leif Hoegh, Jahre and Rasmussen Offshore, on all kinds of vessels ranging from cargo liners through container vessels/bulkers to semi submersible service platforms. He has also studied maintenance and safety technology, and after going ashore he has mainly been working with cutting-edge marine technology. He has held Managing Director positions in companies like Consilium Norway, Goltens Dubai, and senior positions in Kongsberg Maritime. Gunnar has been market responsible for the Middle East and travelled extensively in the region since 1998.
